Market Maker Models

Market Cycles

The Market Will Move in either one or two ways.

Either price is in a market Maker buy model. Continuing to make higher prices showing Respect to levels of support

or the market is in a market maker sell model. Going lower and lower and showing rejection from levels of resistance.

As easy as it may sound. Many traders struggle when it come to identifying the trend. So we utilize fair value gaps to help.

Fair Value Gaps

Fair Value Gaps

**Bearish
inversion
Fair Value Gaps**

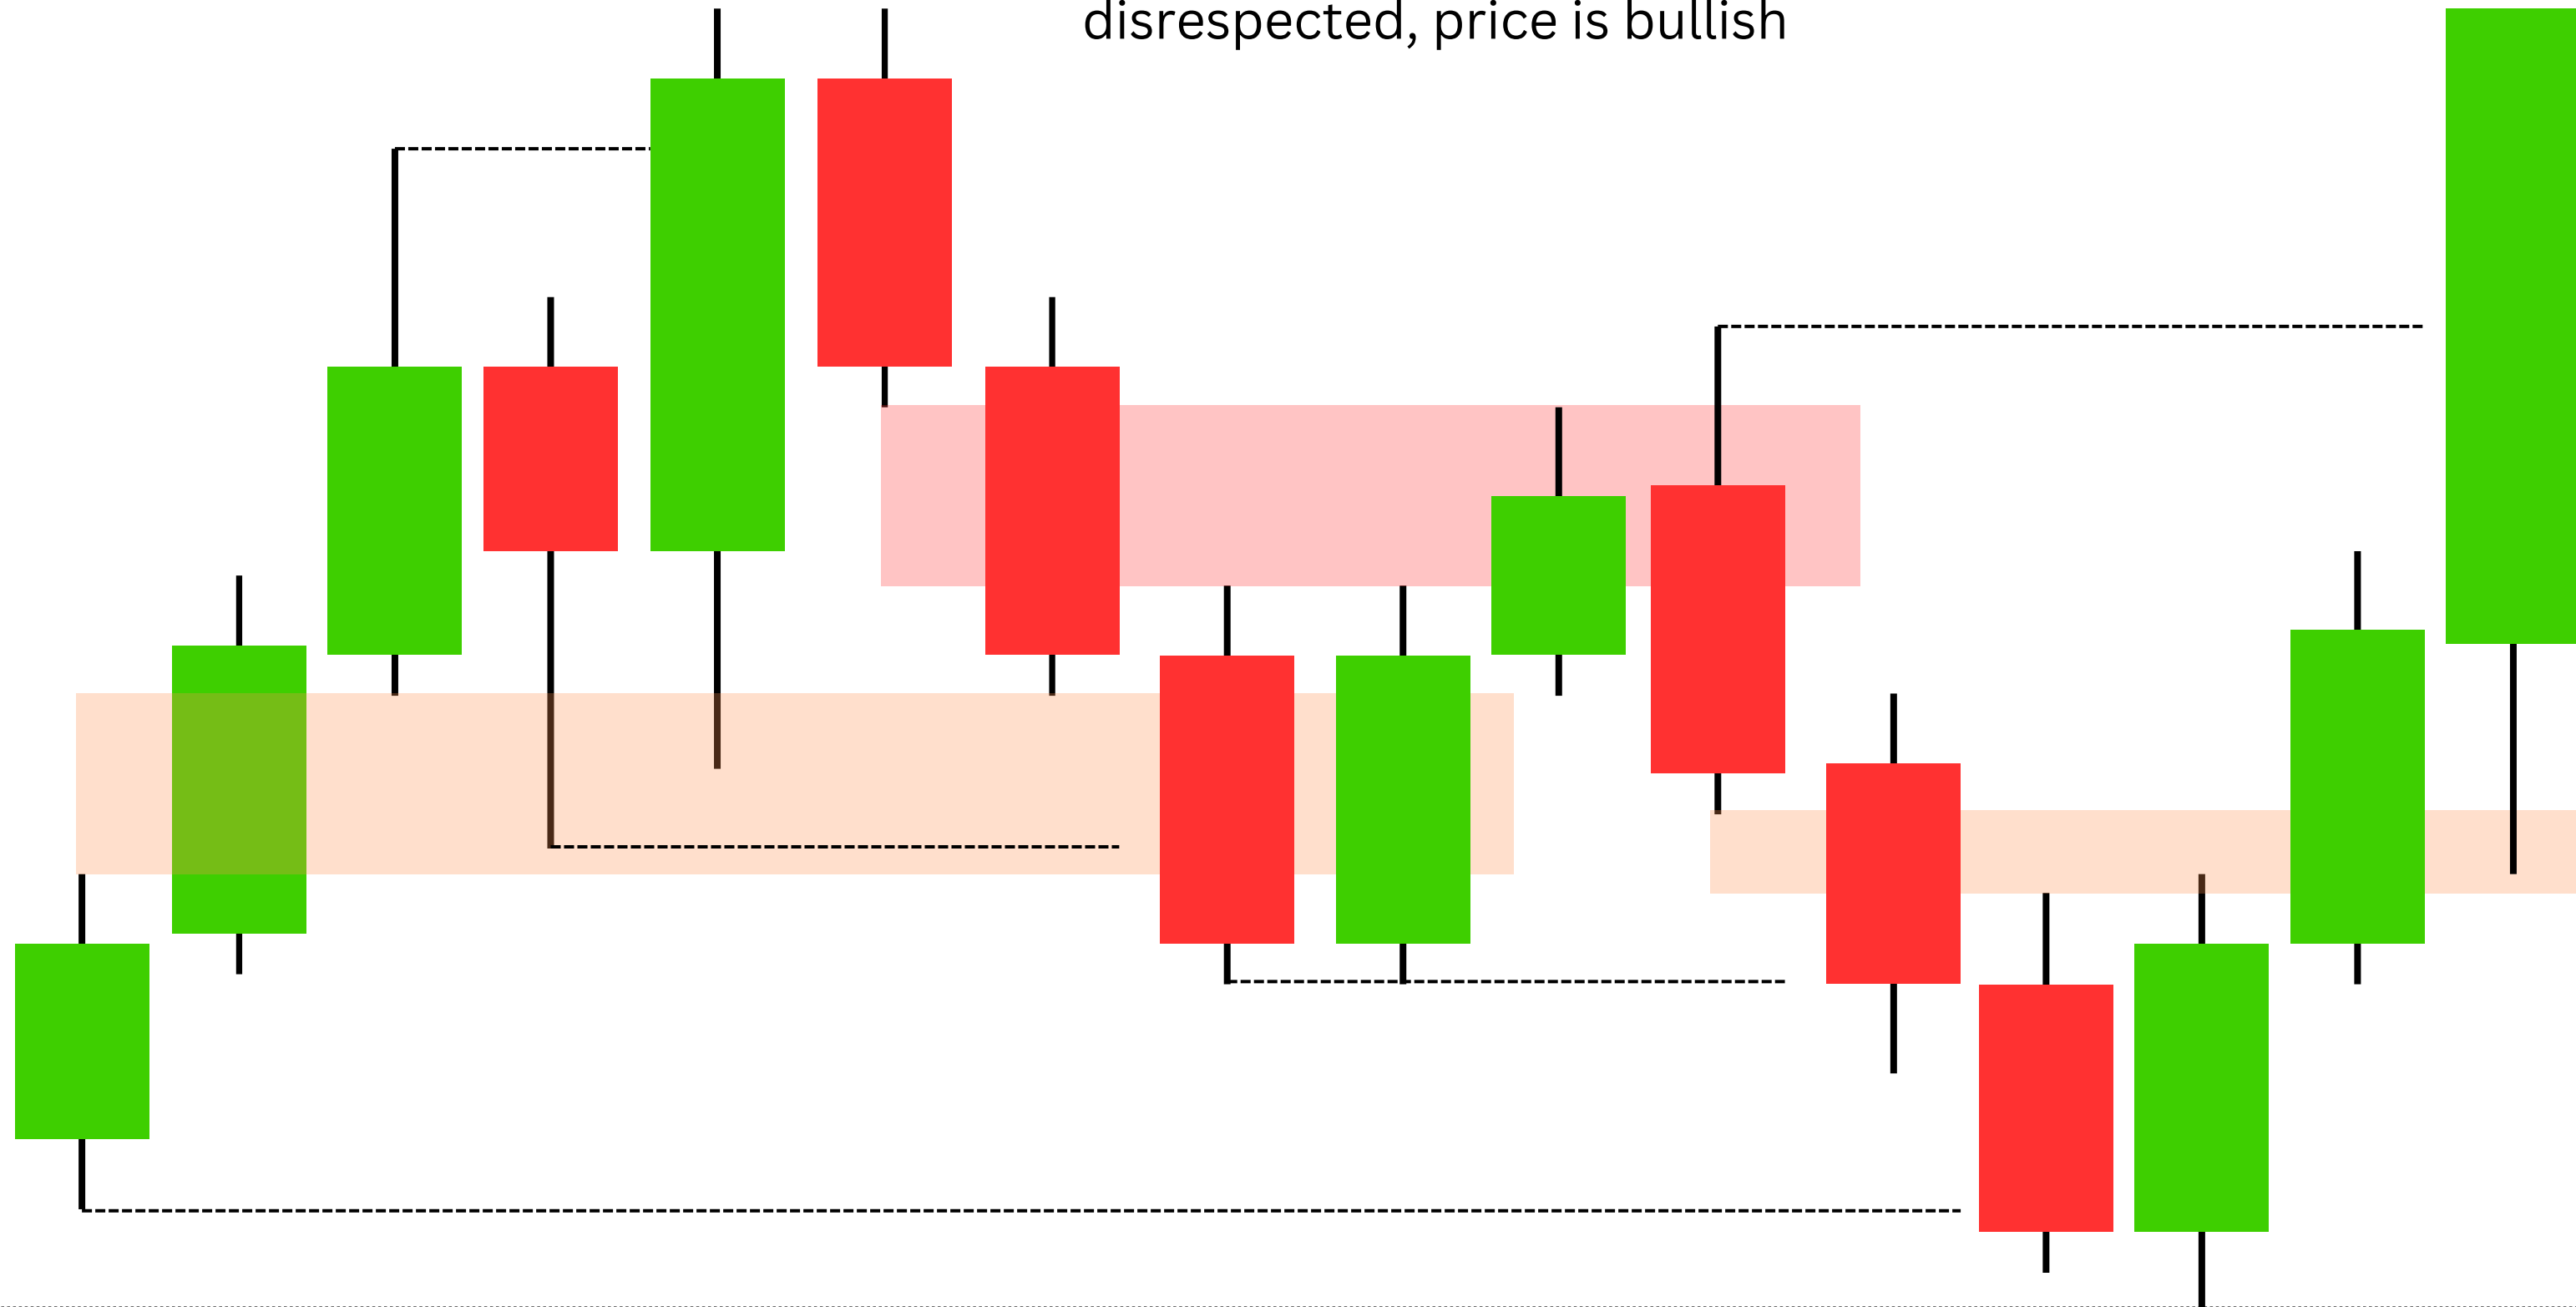

Bullish inversion Fair Value Gaps

Higher Timeframe Influence

If price is respecting Daily, H4, H1 bullish FVG's Price we are likely in a MMBM, if price is respecting bearish FVG's Price is likely in a MMSM, if bullish fair value gaps are being disrespected, price is bearish. If Bearish FVG's is being disrespected, price is bullish

Step By Step Trading Plan

Time

New York Session | 7 - 11am EST

London Session | 2 - 5am EST

Price

When you creating a narrative for the higher timeframes utilize the daily, h4 & H1 timeframes

Before a market session starts, identify.

Is price respecting bearish fair value gaps?

Is price respecting bullish fair value gaps?

Is price disrespecting bearish fair value gaps?

Is price disrespecting bullish fair value gaps?

If your answer to any of these questions puts you in the mindset that your bearish, you look for a short that day during your time window.

If you answer to any of these questions puts you to be bullish, you look for buys that that day during your time window
